

---

Earlier in his career, OZZ Founder John Pineau built a successful start-up business. A major bank admitted fault to actions that allegedly destroyed it and yet failed to be accountable for their actions. Rather than suffering through a life long legal battle in court, John focused instead on the systems that put him there in the first place, assuming he wasn't the only one whose life was turned upside down by events that appeared to be coming from behind the scenes, or events being concealed from the top.

John set out to write a story about it. The result is Future Briefs, a fictionalized true story about a banker named OZZ who set out to build a future for both sides. After a group of bank shareholders, called Rogue, prevent OZZ from realizing his mission, he applies John's story to it. As is the case in the real world, O'Brien's rogue shareholders dismiss it while OZZ tells the truth. And as the story grows, so does John's understanding of geo-political and economic systems that affect billions of people around the world, or pretty much everyone except Rogue.

John envisioned a fiction portal on which he could tell his story and the stories of groups on both sides of disputes. And so OZZ was born on three web sites he now calls the future portal at OZZbox3.com. Following are story highlights and an outline of both the private service he creates for company directors to fund the service in exchange for business value:

Future Briefs Site 1 – Shine Light Of Global Systems Holding Us Back

OZZfiles.com is the fictional baseline that illustrates how Rogue creates systems that benefit Rogue and only Rogue. The fiction brought to us by the Future Brief Series shines light on the London Square Mile headquarters of OZZ O'Brien's bank and Rogue hiding inside it.

Future Briefs Site 2 – Shine Light On The System That Retains Control

TheirMedia.com is the fictional baseline that illustrates how Rogue reinforces the covert systems they put in place. A struggling writer named Keiron McQuaid promotes his book on a struggling radio station to shine light on the group that robbed his whiskey business, called Rogue. O'Brien supports McQuaid behind the scenes after arranging the interview.

Future Briefs Site 3 – Shine Light On Future Movies To Shine Light

OZZmediaCorp.com is the fictional base line that illustrates how the power of storytelling can serve as a bridge to a future for both sides. The story shifts from an eBook to future movies that enable both sides to see each other's perspectives. Inputs are integrated into the company's strategic plan, which is adjusted to meet the needs of its followers.
