True Fiction About Banker Introduces “Fix-It System” To Make Trust
An Asset Both Sides Value. Merges True David & Goliath Type Story
Into Fiction To Demonstrate Systemic Trust Issues And Solutions.

Free Books Available To Build It The Way Both Sides Want

London City Airport – Set against the backdrop of his private jet’s interior gilded décor, OZZ O’Brien speaks with the authority of a man who controls much of the world, because he does. Or at least he thought he did. As founder of the bank that controls all the world’s banks, O’Brien has been on a mission to build trust in business, but he failed. “My shareholders ruined it and now they’re blocking me. Not all of them – just the rogue ones. They do a lot of damage. They prevent people from achieving their dreams. But it’s over for them. It’s time to fix it.”

And fix it he will, but this time differently. O’Brien struggled for years to find out what held him back, which included shining light on the problem through TheirMedia.com, the bank’s media asset, but was faced with similar challenges. “I learned that TheirMedia.com is committed to rogue messaging. I tried to get them to tell the truth but they’re not interested in helping anybody but their controllers. I call them Rogue. I had almost given up but then I found this guy. He wrote a story about his whiskey business. Rogue robbed it. Ruined him. TheirMedia.com wouldn’t help. So he decided to fictionalize it get it past them.”

According to O’Brien, fixing the system is a lot of work, especially with Rogue in control of the narrative, but he’s up to the challenge, especially now that he’s found this true story. “We’re offering free books to bring followers with us, and I’m gonna reach out to my friends. Their strategic plans need narrative strategies. We’re gonna measure responses and build trust into an asset for the balance sheet.”

As OZZ packs his laptop bag, signaling the end of the interview, he stands and looks me in the eye. “I never imagined that an injustice like this, caused by Rogue, would make such a difference in the world. We’ve figured out a way to bring both sides into the equation. The third site is OZZmediaCorp.com. That’s where the real story starts, but one step at a time. We have to get people outside the boardroom involved. That campaign is underway. One step at a time – One step at a time.”
